

A BIT ABOUT A BYTE:

How much bandwidth does your house need?

8 KBPS

Smart Watch

12 MBPS

*Teleconferencing
with colleagues*

6 MBPS

*3-way video
chatting with
relatives across
the country*

512 KBPS

Home Assistant

25 MBPS

*Connected
4K TV*

50 MBPS

*AR/VR Home
Gaming System*

6 MBPS

*Smart
Thermostat*

12 MBPS

*Wi-Fi enabled
Washer and
Dryer*

Whether you are video chatting, uploading family videos, or playing your favorite online games—you may be using more broadband than you think. Around the US, broadband providers are transforming their networks to all fiber-optic technology to deliver the speed and reliability you need to stay connected and enjoy all of your favorite devices.
