Southern Tier Network, Inc. (STN) www.southerntiernetwork.org is accepting applicants for the full-time position of Broadband Project Manager.

STN is an innovative and unique telecommunications provider headquartered in Corning, NY. STN owns and operates over 600 miles of high-capacity fiber optic infrastructure throughout eight interconnected counties in Upstate New York. STN operates as an open access provider, striving to improve the broadband services for our municipal, enterprise, and carrier-based customers.

Reporting directly to the CEO, this position has a key role in the success of broadband projects across STN's growing middle mile open-access fiber optic network covering an 8-County footprint in the Southern Tier and Finger Lakes regions of New York State.

The Broadband Project Manager is responsible for the development, delivery, and ongoing management of various short- and long-term STN projects.

The Broadband Project Manager must provide excellent customer service and must be responsive to client contacts of all internal and external requests.

The Position will work in unison with the STN management team to provide services that ensure customer projects are properly fitted, on-time, and within budget.

The Broadband Project Manager should be able to act as a consultant for the STN Management Team and external stakeholders, explaining and clarifying procedures, maintaining project plans and ensure key milestones for assigned projects are being met.

This Position will play a critical role within the STN management team supporting a variety of functions and roles involved with STN's operations - from the initial concept through implementation.

Responsibilities will include the following:

- Project Management, development, and oversight for new customer projects;
- Develop, foster, and nurture relationships with current and prospective STN customers and partners;
- Work with CFO for project budget review;
- Work with the engineering and operations team for communicating project status with all stakeholders;
- Generate monthly Project Status reports for board of directors;
- Primary liaison with customer; coordinating project meetings; relaying critical information and project status to customers and the STN management team;
- serve as an STN representative for various Broadband related community meetings, workshops, and functions;
- lead multiple complex projects at once, coordinating with internal and external project teams, and producing high-quality, on-time results;
- Other duties as assigned.

The ideal candidate will have project management and broadband industry experience.

A minimum two-year degree (or in current enrollment pursuing degree) with 2+ years of relevant experience. In lieu of a degree, 4 years of increasingly challenging and relevant experience may be considered.

STN will provide a competitive salary and benefit package to the successful candidate.
